

Probiotic Power

Totally Green, Totally Clean

ProPower... A holistic approach to healthcare deodorisation.

Aged Care Facility Applications & Procedures

Some of the many ways ProPower can work for you for deodorising the malodorous odours of putrefying bacteria –

- Residents Rooms
 - Curtains
 - Carpets
 - Bedding
 - Bathrooms (Floors, Drains, Toilets)
 - Furniture
- Hallways
 - Carpets can be wand sprayed
 - Drapery
 - Sofas
- Kitchens / Eating Areas
 - Mopped or sprayed under tables and food prep benches
 - Poured down drains
 - Used for deodorizing food spillages or spoils
- Laundries
 - Use in washing machine to deodorise clothing and the machine
 - Use to soak Soiled Clothing in a tub
- General
 - ProPower kills mold and mildew spores over a few applications
 - Spraying of Bed Pans by general staff

Dosage Rates

- Carpets (150ml per liter of water)
 - Inside Steam Cleaners
 - Pre-Spray before Vacuuming
 - General spray over carpets to mitigate fresh odours (allowing to dry naturally)
- Tiles / Linoleum / Timber (100ml per liter of water)
 - Use a dilution when mopping floors in bucket
 - Or pre spray floor before mopping
- General Deodorising (100ml per liter of water)
 - Room Spray
 - Curtains
 - Linen
 - Shoes
 - Rooms where there are Festering Sores
 - Incontinence and Gangrene
- Laundries (100ml per load or in a tub to pre-soak)
 - Good for soiled clothes
- Mold and Mildew (100ml per liter of water)
 - Able to be sprayed in a repeated fashion on a wide range of materials to eradicate mold and mildew.
- For Smelly Drains (15 ml into a cup of water)
 - Pour down drains at the end of the day, so ProPower has a chance to work over night in the S bend.
