

Probiotic Power

Totally Green, Totally Clean

ProPower... A holistic approach to healthcare deodorisation.

Commercial Strength Deodoriser

Probiotic Power has brought a game changer in deodorisation to the Australian market. "ProPower" is a probiotic deodoriser which focuses on all organic odours! It goes above and beyond what chemicals can deliver! and are totally safe for all people, animals and the environment! The ProPower bacteria use the organic matter as a food source to quickly achieve a quorum. Once a quorum is reached, they inhibit the growth of putrefaction bacteria, which are responsible for the foul odour. We have tested ProPower on extreme organic odours such as sewage lagoons and had nothing but success! ProPower eliminates odours by consuming them (not masking them).

- ProPower is fast acting with an above 90% consumption rate of Ammonia and Trimethylamine!
- ProPower has a unique ability to reduce and remove uric scale when used consistently in the cleaning of urinals.
- ProPower is proficient for wastewater, line breaks, drying beds, lagoons, leachate, commercial cleaning purposes etc.
- ProPower is easy and safe to handle being chemical free and non-toxic.
- ProPower is an Australian made and owned business.
- Very cost effective!

Lagoon Size	Dosing Quantity	Lagoon Size	Dosing Quantity
100 sqm	20 Litres ProPower	500 sqm	100 Litres ProPower
200 sqm	40 Litres ProPower	800 sqm	160 Litres ProPower
400 sqm	80 Litres ProPower	1000 sqm	200 Litres ProPower

METHOD: Shake / rock container of ProPower, then dilute as necessary to give adequate coverage when spraying over pond / Lagoon. ProPower can be diluted as much as required provided the Litres per SQM of concentrate are correct.
