

## Deodoriser

“**ProPower**” is a probiotic deodoriser which focuses purely on organic odours! It goes above and beyond what chemical cleaners can deliver. **ProPower** is totally safe for all people, pets and the environment. The bacteria within **ProPower** use organic matter as a food source, to quickly achieve a quorum. Once a quorum is reached, they inhibit the growth of putrefaction bacteria which are responsible for the foul odour. We have tested **ProPower** on extreme organic odours and had nothing but success! **ProPower eliminates odours by consuming them, not masking them like chemicals.**

- **ProPower** is totally safe to work with, and live around, being completely chemical free and non-toxic.
- **ProPower** eats organic odours such as animal smells, urine, putrefying food, foot odour and mould!
- **ProPower works brilliantly in the home, car, kennel and farm.**
- **ProPower** makes for a better and safer work place.
- Once the bacteria in **ProPower** achieve a quorum, they release molecules such as fatty acids and bacteriocins which act as toxins and growth inhibitors against common pathogenic bacteria.
- **ProPower** is Australian owned and made
- Very cost effective due to being a concentrate, for most applications a dilution of **ProPower** to water 1:10 can be used.
