

Probiotic Power

Totally Green, Totally Clean

More businesses are making the switch to ProPower for their waste reservoir cleaning and deodorisation needs

Domestic/Commercial Bio/Septic Systems

ProPower is a revolution in the management and treatment of Bio / Septic tanks, be it Domestic, Commercial, Marine, RV/Caravan or Portable toilets. **ProPower** can prevent costly repairs, prevent smells, break down waste and is environment positive! Chemical and Enzyme based products currently used have limited success, due to their limited results and necessity for very frequent dosing! **ProPower** is cost effective and proven to work.

METHOD: Shake container of ProPower, then add the required amount into a bucket, add a few litres of water and pour down toilet. **TIP:** Pour down all toilets and drains that lead to the waste water system. This allows the pipework to be treated between the toilet and the tank, moving forward follow the same procedure, **Quarterly**.

Initial Dosing

Tank Size	Dosing Quantity
5000 Litres	1.5 Litre ProPower
10000Litres	3 Litre ProPower
20,000 Litres	6 Litre ProPower

Quarterly Dosing

Tank Size	Dosing Quantity
5000 Litres	500ml ProPower
10000Litres	1.5 Litre ProPower
20,000 Litres	3 Litre ProPower
